RECOMMENDED POWER UNIT

MVac Central Vacuum System offers Power and Silence, Versatility, Improved air quality, and reliability supported by an experienced manufacturer's extended warranty of up to 10 years on selected models.

**VERSATILE
and easy
to use!**

MVac has designed a versatile central vacuum system that can be used with or without a convenient bag. Remove the bag and adaptor and let the cyclonic air flow settle the dust particles to the bottom of the dust canister. HEPA filtration retains finer particles from circulating in your home environment.

www.mvac.com

UNIT STATUS MONITOR*

will advise you when to empty the canister or change the bag, and when to have the unit checked by a service center. An LED indicator on a vacuum inlet close at hand will show you the information.

* M9, M11 and M12 Models only
