Dust Mop

Dust & vacuum hard-surface floors at the same time!

For optimum performance, the mophead was designed with a front air channel opening that maximizes airflow so that any dirt & dust trapped deep in crevices are easily lifted away, while the fluffy mophead gently dusts & polishes the flooring for a clean, shiny finish.

Another convenient feature of this tool is the removable & washable mophead that simply velcros off & can be thrown in the washer for many repeated uses.
